

SUNRISE SESA

Designing, Manufacturing, and Integrating LED Displays since 1976

The Sunrise Ticker Difference

Sunrise Ticker products are developed to perform better than the competition. Our products are developed with the goal of providing our clients with a good, value-based purchase that will help achieve their messaging goals. Our commitment to American made, high-quality, and consistent products and services is what sets us apart from others.

Our services also combine a good value-based approach, and still provide quality. Our attention to customer detail is a critical component in our customer service area. Our custom sales software allows our staff to keep detailed, accurate notes on our customers' requirements, allowing us to fulfill orders to their preferences. This commitment to consistency allows you to feel confident when you ship orders in for service.

Proudly Made in America

Sunrise Ticker is proud to develop and manufacture our MST, TKR, and custom Ticker products at our Pembroke, Massachusetts facility. Our location allows us to respond to your inquiries and support questions quickly and efficiently so you can get your message across. We pride ourselves on manufacturing high-quality LED tickers that are built to last and clearly display your content. We will be with you every step of the way, from our first call to our quick delivery and installation on location.

“ Sunrise took time to make sure our problem found a solution, and worked with a volunteer of ours via email and phone to troubleshoot the installation of parts in our stock ticker. The parts shipped so quickly, and he made sure we had everything for a successful installation. Very happy with our experience! ”

Find The Right Product For Your Needs

For The Compact Message - The MST

Looking for a compact way to get your message across? The MST Series is just what you're looking for! This Series is an extendable, single-line, text based system, great for use as wall accents, mini ticker tapes or donor wall displays. Each MST is independently programmable with any message of your size and choosing. Custom enclosure materials and colors are also available to accommodate the aesthetic of any environment.

The Classic Ticker - The TKR

The TKR Series is your classic "ticker" LED display. These constantly moving displays are great for sports scores, Twitter feeds, or any other information that would need to be continuously updated. Full-color and constantly moving, the TKR Series is a feast for the eye.

If you have a project that is more out of the box we'd be happy to work with you to design a one of a kind solution.

Frequently Asked Questions

What is the viewing distance of a Ticker?

We suggest that the character height is one inch per 50 feet observance.

How does the data get to the sign?

The sign is accessed through ethernet.

How are Tickers installed?

Cleat, rail systems, chassis ceiling mounts are an easy way to hang your Ticker to any wall. We have the ability to design around your space to accommodate most configurations.

How does a Ticker display data?

For text or logo, we use a web application for your personal messaging. For RSS feeds, we have designed a specific controller to accommodate this. For data subscriptions we use our partner C-Scape or RISE Vision.
